

Quick User Guide

Taylor-Dunn SS5-46 Step Saver

* Warequip accepts no responsibility for equipment that is operated incorrectly, or not in accordance with operation manuals.

WARNING

These vehicles are not designed to be driven on public roads or highways, They are available in maximum designed speed of 10kph. Do not exceed the maximum designed speed. Exceeding the maximum designed speed may result in steering difficulty, motor damage, and / or loss of control. Do not exceed locally imposed speed limited.

WARNING

- 1.1. Make sure they key-switch is in the "OFF" position, then remove the key.
2. Set the park brake.
3. Place blocks under the front wheels to prevent vehicle movement.

Key Switch:

A key-switch, located on the right side of the steering wheel, turns on the vehicle. Rotate the key clockwise to turn the vehicle power on, counter clockwise to turn power off.

The key switch should be in the "OFF" position whenever the operator leaves the vehicle.

The switch is also designed to secure and disable the vehicle. The key can only be removed when the key-switch is in the "OFF" position.

Horn Switch:

The horn switch is located on the left side grip.

Depress the switch to sound the horn, release it to turn it off.

The directional control lever:

located on the right side of the instrument panel, determines the direction of travel of the vehicle. Push the top of the switch to engage the forward direction. Push the bottom of the switch to engage the reverse direction.

DO NOT SWITCH from forward to reverse or vice-versa while the vehicle is in motion. Make sure the vehicle is completely stopped before shifting.

The forward-off-reverse switch should be in the centre "OFF" position, with the key-switch off and the park brake set whenever the operator leaves the vehicle.

**Please ensure you are familiar with the manual and the correct operating instructions.
If in doubt contact supplier before use.**
